Letter of Volatility

Dear Customer,

please find below memory volatility information for the following Wibu-Systems products:

WibuBox, 30xx-06-xxx:

16 kByte non-volatile memory to store cryptographic keys, license information and data using WibuKey-API from protected application.

CmStick, 1001-0x-xxx:

Upto 384 kByte non-volatile memory to store cryptographic keys, license information and data using CodeMeter-API from protected application.

CmStick/M, 1011-0x-xxx, CmCard/xx, 104x-0x-xxx

Upto 384 kByte non-volatile memory to store cryptographic keys, license information and data using CodeMeter-API from protected application plus flash disk of upto 64GByte non-volatile memory that can be used as disk from host interface (USB, (u)SD, CF, CFast).

If you require further specifications, please do not hesitate to get back in touch. Thank you for choosing Wibu-Systems products.

Best Regards,

WIBU-SYSTEMS AG
